# Powering up both controller modules and displaying the LOADER prompt

You power up the existing controller module and the new controller module to display the LOADER prompt.

#### **Steps**

Power up the controller modules and interrupt the boot process, using the steps for your configuration:

If the controller modules are	Then
In the same chassis	<ul> <li>a. Verify that the new controller module is not fully inserted into the bay.</li> <li>The existing controller module should be fully inserted into the bay because it was never removed from the chassis, but the new controller module should not be.</li> <li>b. Connect the power and turn on the power supplies so that the existing controller module receives power.</li> <li>c. Interrupt the boot process on the existing controller module by pressing Ctrl-C.</li> <li>d. Push the new controller module firmly into the bay.</li> <li>When fully seated, the new controller module receives power and automatically boots.</li> <li>e. Interrupt the boot process by pressing Ctrl-C.</li> <li>f. Tighten the thumbscrew on the cam handle, if present.</li> <li>g. Install the cable management device, if present.</li> <li>h. Bind the cables to the cable management device with the hook and loop strap.</li> </ul>
In separate chassis	<ul><li>a. Turn on the power supplies on the existing controller module.</li><li>b. Interrupt the boot process by pressing Ctrl-C.</li><li>c. Repeat these steps for the new controller module</li></ul>

Each controller module should display the LOADER prompt (LOADER>, LOADER-A>, or LOADER-B>).

If there is no LOADER prompt, record the error message and contact technical support. If the system displays the boot menu, reboot and attempt to interrupt the boot process again.
